01 PROFESSIONAL PROFILE

Product Manager and Product Owner with 10+ years in games — live casino game shows at Evolution, 8 Ball Pool at Miniclip. Passionate about AI: on my own initiative I build AI-assisted tools that help teams make games more smoothly, and AI-powered products of my own.

I turn business and user needs into clear requirements, roadmaps and shipped features, working with international, multidisciplinary teams and using data to guide decisions.

Hands-on with AI: I start from a real problem, define the product and use AI to build and iterate until it works. IBM-certified AI Product Manager.

02 CORE SKILLS

01
Product Management
Strategy · Discovery · Roadmaps

02
AI Product Development
Claude Code · Agents · Rapid prototyping

03
AI Workflows & Automation
Skills · Connectors · Human-in-the-loop

04
Data & Analysis
KPIs · Behaviour · Insights

05
Live Operations

06
Leadership & Collaboration
Mentoring · Stakeholders · Delivery

03 PROFESSIONAL EXPERIENCE

Evolution
Sep 2021 — Present

Product Owner Current role

Lead the creation of live casino game shows with multidisciplinary teams, from concept to launch, acting as the bridge between stakeholders and development teams.

- Translate business and stakeholder needs into clear requirements, priorities and delivery plans.
- Manage and mentor a development team, supporting delivery and professional growth.
- Work with product and operational data to identify anomalies and support decision-making.
- On my own initiative, build AI-assisted tools (Claude, GitHub Copilot) that remove manual work for my team and others, so we can create games with fewer problems and more efficiently.

KEY GAMES Craps · MegaBall · Dragon Dragon · FanTan · Monopoly Big Baller · Super Color Game

Miniclip
Jun 2017 — Sep 2021

Product Manager Live Operations

Managed Live Operations for 8 Ball Pool and War Wings, owning events, promotions and roadmaps with international teams.

- Worked with Tencent and Asian development teams on game discovery and international markets.
- Created tools that improved the speed and efficiency of Live Ops event management.
- Used data and player behaviour analysis to support product and Live Ops decisions.

Tiago Lab

Personal AI product lab

Founder & Product Builder

AI projects

Personal AI projects outside work: games, creative tools and everyday apps, built end-to-end with AI.

- **FootLab** — football management simulation built with AI as the development partner, with me owning vision, rules, systems and priorities.
- **Character Creator & Background Processor** — simple, task-based desktop interfaces over complex local ComfyUI image workflows (FaceID, ControlNet, upscaling).
- **NewsReel, Folha, Financial Manager** — news-to-video with European Portuguese narration, plant identification with user confirmation, and a local-only finance app.

STACK Ollama · Mistral · ComfyUI · Python · JavaScript · Django
